1.1.1 Second Test

Their Audibert (2004) requirements[1] are really amazing[2] Budanitsky and Hirst (2006).

Looks like everyting's working. Great. Let's talk about lexical items (LIs) and parts of speech (POS) in Natural Language Processing (NLP). I mention again LIs. Oh I have a symbol too, it's temperature degree (θ).

1.1.2 This is another Subsection

Remember that subsections need to be indented!

1.2 Yeah

And here's a long quotation, it should be an indented block and single-spaced:

> Fusce mauris. Vestibulum luctus nibh at lectus. Sed bibendum, nulla a faucibus semper, leo velit ultricies tellus, ac venenatis arcu wisi vel

Time for some maths, and later there's a table.

$$\left[M \frac{\partial}{\partial M} + \beta(g) \frac{\partial}{\partial g} + n\gamma \right] G^{(n)}(x_1, x_2, \ldots, x_n; M, g) = 0 \qquad (1.1)$$
